(a) detected bursts: with real bursts vs burst-free
negative bursts per granule-hour (dotted: true losses)
stringency SP
MS-like (noise 0.7%): with bursts
MS-like (noise 0.7%): burst-free twin
PP7-like (noise 18%): with bursts
PP7-like (noise 18%): burst-free twin
(b) how many true bursts are found
true losses found by the detector (%)
stringency SP
MS-like (noise 0.7%)
PP7-like (noise 18%)
(c) size of what is found vs true size
median burst size (% of granule)
stringency SP
MS-like (noise 0.7%): detected
MS-like (noise 0.7%): true
PP7-like (noise 18%): detected
PP7-like (noise 18%): true
